Who am I?

Hi, I'm Bram — a software engineer specialized at mobile app development, based in Malang, Indonesia.

I have over four years of experience in software engineering, with more than two years professionally, specializing in mobile app development using Flutter and Jetpack Compose. Currently, I'm doing an internship as a frontend software engineer at Arkatama software house, where I've worked with Laravel Blade and am now developing a web app using React.js. I'm also interested in Swift for iOS development and excited to expand into that ecosystem soon.

Education

Universitas Merdeka Malang

2022 - Present

Pursuing Bachelor Degree in Computer Information System

SMK Negeri 4 Malang

2020 - 2022

Software Engineering Highschool Student

Experiences

Frontend Software Engineer at PT. Arkatama Multi Solusindo

February 2025 - August 2025 (7 months)

Skills: Laravel Blade, React.js, Web App Development

Interned at PT. Arkatama Multi Solusindo, developing web apps from design implementation to API integration. Started with Laravel Blade, later transitioning to React.js for a more atomic frontend workflow.

Android Development Cohort at Bangkit Academy

September 2024 - January 2025 (5 months)

Skills: Kotlin, Jetpack Compose, Mobile App Development

Participated in Kampus Merdeka Batch 7, a program by the Ministry of Education, focusing on the Android Development track. Gained hands-on experience with native Android development using Kotlin and explored real-world mobile app workflows.

Frontend Software Engineer at Dusun Web

November 2023 - July 2024 (9 months)

Skills: Flutter, React.js, Mobile App Development, Web App Development

Did a short internship provided by Dusun Web at 3rd-4th college semester. I'm assigned role as lead frontend software engineer, responsible developing web apps using Next.js and mobile apps using Flutter.
